DA Range Toilet Cubicles

Our DA Toilet Cubicle Range is ideal for medium to low footfall environments making it perfect for areas such as offices, supermarkets, village halls and clothing shop changing rooms. The cubicles are delivered ready to install which allows a reduction in installation time and costs. The materials provide an easy to clean and aesthetically pleasing finished product.

This system is manufactured bespoke to your measurements to ensure it fits first time. We will provide you with a Drawing for Approval before manufacture takes place to ensure all the details are correct.

Advantages of the DA System

- Delivered ready to install
- Bespoke
- Quick lead time
- Easy install: no site cutting required
- Easy to clean
- 10 year guarantee on cubicle fittings
- Cost effective
- Mix panel colours to provide contrast
- Fully water and rust proof SAA fittings

Highly Recommended for

- Office toilets
- Supermarkets
- Clothing store changing areas
- Taste booths
- Shop floor toilets
- Reading booths and office cubicles
- Works toilets
- Any dry area requiring cubicles

Standard Panel Dimensions

Panel Material

Melamine Faced MDF

The Dry Area System is constructed from 18mm MF MDF panels, which are a step up in quality from MFC (chipboard) which is used for our Contractor Range.

The panels are completed with a 2mm PVC knock resistant edge edged all round. Melamine is extremely easy to maintain and exceptionally hard wearing, making it a perfect solution for toilet cubicle solutions.

These material properties provide a simple low maintenance cubicle system.

Cubicle Fittings

Heavy Duty Satin Anodised Aluminium
